

Dr. DARIO HUGO DIAZ PEREZ
INTENDENTE MUNICIPAL

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is responsible for the investigation. The investigator must identify the problem and the scope of the investigation. The investigator must also identify the objectives of the investigation and the methods to be used.

2. The second step in the process of the investigation is the collection of data. This is done by the investigator who is responsible for the investigation. The investigator must collect data that is relevant to the problem and the objectives of the investigation. The investigator must also collect data that is reliable and valid.

3. The third step in the process of the investigation is the analysis of the data. This is done by the investigator who is responsible for the investigation. The investigator must analyze the data to identify the causes of the problem and the effects of the problem. The investigator must also analyze the data to identify the solutions to the problem.

4. The fourth step in the process of the investigation is the presentation of the results. This is done by the investigator who is responsible for the investigation. The investigator must present the results of the investigation in a clear and concise manner. The investigator must also present the results of the investigation in a way that is understandable to the audience.

5. The fifth step in the process of the investigation is the evaluation of the results. This is done by the investigator who is responsible for the investigation. The investigator must evaluate the results of the investigation to determine the effectiveness of the investigation. The investigator must also evaluate the results of the investigation to determine the value of the investigation.
