## SALT SPRINGS

(Topographic Map)

The following notes are based on observations made at the salt springs, April 1901, and the topographic map of the area taken from the original survey of the U.S. Geological Survey. The elevations given are obtained by leveling on the roads, paths, and trails, and the elevations of the springs are determined by the height of the water above the level of the sea.

### Key to the Symbols

(Topographic Map) The symbols used in the topographic map are as follows: Roads, paths, and trails, black lines; streams, blue lines; lakes, green lines; contour lines, red lines; points of interest, dots; and points of elevation, stars. The elevations of the points of elevation are given in feet above the level of the sea.

Topographic Map.
